ALL FEET

A BOOT TALK

All feet walking over the sidewalks of this town in shapeless shoes, in leaking soles, in boots that blister, in any footwear that does not wear right, should wend their way our way—the town's real rendezvous for real boot value. We do not let a pair of boots or shoes leave our showroom to be a grievance constantly travelling with the buyer whether he, or she, goes, in the day's walking.

WE PROMISE SATISFACTION

In everything we sell, we promise satisfaction—in shape, in weight, in wear, and in cost. Better shoes never came into this town than the stock we keep; there is no dealer who can show more varied sizes or hold out a greater certainty of a fit; there is no better value offered anywhere in Alberta. Our shoes are economical in two ways—they wear longer and cost less.

Man Killed Near Station

Yesterday forenoon about 10:30 a man named Thomas Brown was run over about 800 yds west of Strathmore station and instantly killed by a freight train shunting in the station yard. How the accident happened is not exactly known. The engineer of the train did not observe him in front of the engine, and it is thought he may have been endeavoring to jump the train and fell between two of the cars. Deceased was a laborer and had been employed by the Alberta Pacific Elevator Co.'s local manager, Mr. F. R. Lilly, for the past two weeks. On the day of his death he was starting work with Messrs Hayden and Skoon, contractors. An inquest on the body was held last night, but was adjourned in order to get the attendance of the train crew. Deceased was a native of Lancashire, England, and was by profession a sailor. He had only been in Alberta a short time. The body when found was in a terribly mutilated condition, the head being severed from the trunk.

Presbyterian Services Commence

Sunday morning saw the reopening of Presbyterian services in Strathmore. The service was held in Lloyd's Hall, and was very well attended. Mr. Rennie made the announcement that services would be held in Lloyd's Hall on Sunday, May 1 (tomorrow), and that on Monday evening, May 2, a meeting would be held in Lloyd's Hall to consider the desirability of immediately erecting a Presbyterian place of worship. It is hoped that all Presbyterians in the district will turn out to tomorrow's service, and that they will all turn out to the meeting on Monday.

LOCAL JOTTINGS.

Mr. J. A. Schultz received his new engine and 12-plow gang at the beginning of the week, and is now tearing up the sod at the rate of from 30 to 50 acres a day with it.

Dr. Girvin has bought the three lots on Main Street between W. McLean's and Downie & Salmon's.

Messrs J. S. Dennis, C. W. Peterson and other officials of the C.P.L.C. were here Tuesday and went over the Demonstration Farm to inspect the contemplated extensions.

Dr. Keeler, of Sterling, Ill., who owns some land in the district, visited town this week.

Mr and Mrs G. D. Dewitt, Lynn Centre, Ill., and Mr and Mrs. Omaha, were among the settlers arriving here this week.

Mr. Anton Weyers, of the Riverside Lumber Co., left on Thursday for his native Holland. He expects to return in a few months with Mrs Weyers.

As will be noted from our advertising columns, Mr Paul J. Harrison owns his new rooming house, which he has fitted up in a most complete manner, furniture, etc., being new and up-to-date. He is already assured of liberal patronage.

There has been a heavy mortality among horses this fortnight past. Among those who have lost valuable animals were Messrs H. C. Best, Otto Stradick, F. W. Singler, and Deech & McClintock.

Mrs. Cumming, wife of Mr. Cumming, watchmaker, arrived here Sunday.

Mr and Mrs Watt are back here again.

A meeting of local A.F. & A. M.'s will be held to meet Deputy Grand Master Blair next week and discuss formation of new Lodge. Notification of date will be made later.

On Tuesday, to Mr and Mrs McComb, a son and daughter were born. Owing to pressure on space, a number of items are unavoidably crushed out.

A General Clean-Up COUNCIL DISCUSSES THIS AND OTHER IMPORTANT MATTERS

Strathmore Town Council met on Tuesday night, and went through a lot of business, the meeting lasting till 11 p.m. All the members, consisting of Messrs McElhoes, McCulloch and Waddy, were present, also secretary-treasurer, A. D. McKnight, the newly-appointed medical officer, Dr. Girvin. The only member of the public present beside the reporter was Mr W. E. Brown. The minutes of the previous meeting were read and adopted.

BOND TROUBLES

A letter was read from Mr. John Perry, assistant tax commissioner, explaining, in reply to a letter of the Council, that if it was desired to extend the period of repayment of the loan of \$2000 for the fire hall from 4 to 9 years, the Council would have to send for a petition to this effect signed by the majority of the resident ratepayers.

Mr. McElhoes explained that the term of years allowed by the original petition was 4, but they had found it difficult to get borrowers to give such favorable terms for a loan for that period as they would for a longer period, and as it was a building which would be useful to future townspeople it would be more just to have the payments spread over the longer period. It was therefore agreed to circulate a petition among the resident ratepayers asking for authority to borrow a sum of \$2000 payable within 9 years.

LOCATING THE CEMETERY

A letter was read from Messrs Short, Ross and Selwood regarding the location of the new cemetery, and asking the Council where it was intended to have it.

There was some discussion regarding this, and it was finally agreed that a committee consisting of Messrs Waddy and McCulloch be appointed to look over the ground and make a recommendation.

CEMENT SIDEWALKS

A letter was read from a firm of Calgary contractors asking if it was the intention of the Council to put down any cement sidewalks, and if so, to give them an opportunity of estimating.

THE FIRE BRIGADE

Mr. Van Tighen, Strathmore's fire chief, was expected to have been present at the meeting, but pressure of business prevented him coming.

Mr. McElhoes said the Council wished to give the Fire Brigade all the assistance possible, and for that purpose they had desired Mr. Van Tighen's presence so that they could discuss matters thoroughly. The state of the fire equipment was discussed, and it was agreed to ask the contractor in whose hands the content and plastering work lay to get the job finished as soon as possible. It was also agreed to pay for the water tank and wagon, and have the tank filled and taken up to the fire hall.

Mr. Waddy suggested, with a view to getting the wagon and tank to a fire with celerity, that a reward of \$5 be paid to the first man to hitch on a team to the wagon when an alarm was given. This was moved, seconded, and agreed to.

UNDESIRABLE SQUATTERS

It being stated that much danger and dirt was caused by the manner in which some of the squatters in the centre portion of the town disposed of their refuse and litter, it was agreed to ask owners of property there not to allow squatters to settle down. Block 7 was mentioned as an instance of where squatters were allowing inflammable matter to accumulate.

It was agreed to see that all streets and lanes in Strathmore were kept free of obstruction so as to allow free passage to all parts of the town.

REFUSE DISPOSAL

Dr. Girvin said he had been over the nuisance ground the previous week and saw several dead horses there unburied. These ought to be buried at once.

Had Eczema on Legs For Twenty Years

Think No One Could Have It Worse
—Was Cured By Dr. Chase's Ointment

There are plenty of more fatal diseases than eczema, but not many which cause more downright suffering. The tendency of eczema to recur is annoying and disconcerting, and the itching—the almost constant and persistent itching—nearly drives a person crazy. You can scarcely wonder that people are enthusiastic over Dr. Chase's Ointment, when it brings them prompt relief and actually cures itching, fermenting eczema. And if you could read a few hundreds of the letters we receive from time to time you would not be long in deciding what treatment to apply for eczema, salt rheum and similar skin diseases.

Mr. Fred W. Clark, Pittsburgh, Allegheny Co., Ont., writes: "My mother had eczema in both legs for about 20 years. She doctored for a long time

and tried everything for it, but got no relief until a friend advised her to use Dr. Chase's Ointment, which she got. She found that Dr. Chase's Ointment gave her great relief, so she got some more and continued this treatment faithfully, until now she is entirely free of eczema. I think that any one could have this disease worse than she did, and shall not attempt to describe her suffering. She recommends Dr. Chase's Ointment to any one suffering from eczema."

It is such cases as this that have made Dr. Chase's Ointment the "standard ointment" the world over. You need not feel that it will only displease you if you just try it. Get what you ask for. You will be better pleased afterwards and your intelligence will not be justified next time.

Dr. Chase's Ointment, 90 cents a box, all dealers or Edmondson, Bates & Co., Toronto. Write for free copy of Dr. Chase's Recipes.

A New Horse or Kendall's Spavin Cure?
Warren, Ont., Feb. 19th. "I had a horse that had a spavin for a long time and I had tried nearly every remedy when a neighbor told me to use Kendall's Spavin Cure, which I did and I am now cured."

Kendall's Spavin Cure is the world's greatest remedy for all swellings. Both horses and lameness in horses. Used the world over for a year. Every rider, stockman, express man, heavy transporter and horse owner greatly should keep it always on hand. A bottle 60c for 25. Ask your dealer for free copy of our Treatise on the Horse or write to DR. A. H. KENDALL CO., 125 Exchange Bldg., New York.

CLEAN UP THE TOWN.

It will be generally conceded that it is a good thing for any town to be as absolutely clean as condition with no rubbish piles or other accumulations lying around to obstruct the way of pedestrian, or no refuse lying around to pollute the air and cause a nuisance.

This being the case, the citizens of Strathmore should take the appeal of the Council to heart and get busy at once, each on his or her own premises, both the back and front yards, lanes, and streets, and get it as clean as the provincial law pin, and what is more, once having got it clean, keep it clean.

It should be the object of every citizen of every town to keep his own town the cleanest on the line. Strathmore has great natural advantages compared with some other towns on the line. It lies on a slope and has good natural drainage. It has excellent facilities for getting rid of refuse to places where it will not cause an eyesore. Let Strathmore citizens, therefore, start immediately and accomplish a thorough cleaning up.

There is another reason. The Council has power to enforce the cleaning up of every place in town. If the work is not done voluntarily it will have to be done compulsarily. Always remember—Cleanliness is next to godliness.

KING ALFALFA.

In today's issue we publish the first of a series of articles by Professor Elliot, superintendent of the Demonstration Farm, dealing with the growing of alfalfa. These articles will be particularly interesting as so many farmers in this district are taking up the growing of alfalfa this year. They will cover the whole subject thoroughly, and as they are written by a practical man, and one who has made an exhaustive study of the subject, they can be depended on for accuracy.

Small Fruits and Vegetables in Strathmore District

In the near future Strathmore will be shipping strawberries by the car load.

This is an assured fact, while there is a doubt about raising any profitable variety of apples, there is no doubt about raising strawberries. The first man or woman to go into them commercially will make a pot of money, as there will be a great demand for young strawberry plants alone. At some near date, there will be a factory canning strawberries for winter use at Strathmore. There will also be a factory canning peas.

This would be already in operation if Strathmore in the past had a live board of trade who knew the resources of the district. Some people will sneer at this, but it would be a sure money maker, as there is no peas canned west of Ontario, and as for the demand, go around to Mr. George Lloyd and find out how many dozen cans of vegetables he uses in his hotel in the month, then figure out the amount each other hotel and boarding-house in the town is using, and you will find that if half this business was done at Strathmore it would mean a respectable sum of money put in circulation at Strathmore.

We can grow peas better than any place I ever saw; why cannot we do them.

Then there is rhubarb. This is sold by the ton in Calgary for preserving and fresh use. I used to sell half a ton a week until the early days, 1894, besides what others sold, so one can form an idea what Calgary uses now; there is Banff, Canmore, Banckhead and other places to supply. Rhubarb grown around Calgary is in poor, as it is dry and woody from lack of water. It can be canned for winter use at Strathmore and sold in competition with the jam (manufactured from Sweden) and rotten fruit imports from Ontario.

Then there is pickles; cucumbers we cannot raise outside, but onions both grown around Calgary are here. This is another article in our factory to turn out and put cash in the farmers' pockets. Then there is the cabbage for the ice cream factories in Calgary, for their sour kraut. When we have supplied them with the raw material we can use up the balance of our cabbage crop in our factory and turn it into

(Continued on page 8)

Another Fire
On Sunday afternoon fire broke out at a temporary shack and horse shed erected by a man named Mr. Tidball, who with his wife and family is going out to a homestead across the Red Deer River. The alarm was quickly raised, and the two fire engines were soon on the scene, but the fire had got a good start, and much valuable furniture, implements, etc., were destroyed. The house was rendered uninhabitable, and a number of the townspeople in removing furniture, etc., from the reach of the fire.

The cause of the fire is unknown, but it is supposed to have been caused by someone carelessly dropping a match on the straw when passing by. The settler and his family had gone out to the country for a drive when the fire broke out, and got rather a shock when they arrived back in late afternoon and found a large portion of their effects consumed.

"KING ALFALFA."

By PROFESSOR ELLIOT, Supt.
 C. P. R. DEMONSTRATION AND
 SUPPLY FARM, STRATHMORE

FIRST ARTICLE

What has been called the "King of Crops," but it is nothing more than a usurper, for the crop that stands head and shoulders above every other in true food value is "King Alfalfa." Grain growing has had its place in the pioneer development of all new countries; yet to continue growing it indefinitely, without replenishing the soil, is absolute robbery of future generations. As rapidly as possible, alfalfa should be introduced into all sections of the country where it will grow.

GRAIN CROPS EXHAUST THE SOIL

The small grains, timothy hay and such crops, when sold directly off the farm, are what are called "Soil Robbers." That is, if we had to purchase the elements removed from the soil by these crops, in the shape of commercial fertilizers the cost would be astonishingly great.

A glance at the following table makes this very evident:

30 bushels wheat removed from soil \$10.00	100 lbs. alfalfa " " 1.00
100 lbs. alfalfa " " 1.00	30 bushels wheat " " 10.00

In comparison with the above, five tons of alfalfa, when fed to the dairy cow, and the product sold as butter, will remove less than fifty cents in plant food from the soil. Thus alfalfa is not only the greatest of all fodder crops, but it is also one of the greatest in the matter of economy of soil fertility.

ALFALFA, OR LUCERNE

This plant has various names, which have been given to it, largely on account of difference produced by the climate, drought, altitude, etc., under which it has been grown in different sections of the world. These names are largely regional names. For example "Tussock," "German," "American," "Arabian," "Peruvian," etc. There is one type to which a proper name has been given, and that is the "Grimm" alfalfa, a variety largely grown in the northern States of Dakota, Minnesota, and Wisconsin. However, the plant that is grown most extensively in these northern sections is the alfalfa known scientifically as Medicago Sativa. From an agricultural standpoint, this is by far the most important, being probably the most widely grown and most valuable forage plant in the world. Hence we say "King Alfalfa."

BOW RIVER ADAPTED TO ALFALFA

There are abundant evidences that alfalfa will be one of the leading crops in the irrigated district lying east of Calgary, known as the Bow Valley. This immense three million acre district has been recently come under the ditch, and already the C. P. R. Demonstration Farm, at Strathmore, has some 20 acres planted last year, that is coming through the winter in splendid shape. A little to the south, in the irrigated district at Lethbridge, alfalfa has been grown successfully for a number of years. So we are sure in saying that in a few years this greatest of all fodder crops will be producing its tons and tons of fodder for the horses, cattle, sheep, swine, and poultry bred in the Bow Valley.

SEED BED

With good seed, proper seed bed and soil adapted to the growing of alfalfa, the farmer ought to be sure of a splendid stand. This statement may be a little strong, particularly in view of the fact that sometimes farmers do experience a difficulty in getting the crop started. This may be especially true of those who have never grown alfalfa. For this reason the farmer must not be disappointed if his first crop is not as successful as anticipated. For on new farming land it not infrequently requires one or more "tries," before success crowns the effort.

However, the crop is such a valuable one that a farmer should go to any lengths to secure a successful stand.

The question has frequently been asked if it is advisable to sow on new breaking. To this we would say, "By all means." We have seen sections of the country where alfalfa would "catch" on almost any ground. In fact, we have seen a good stand secured, when the soil was scattered on the raw sod; but this is the exception rather than the rule, and the safest plan is to sow on ground from which a crop or two of grain has been taken. By cropping for a year or two, an opportunity is given for the leveling up of the ground, so that irrigation is made much easier and more efficient. The seed bed should be in fine tilth. One that is too open and loose is not desirable, neither should

it be hard or lumpy. As the alfalfa seed is small, the particles of earth need to be fine and mellow, so that the moist earth may surround the seed completely and snugly. In this way germination is much more rapid and sure. We should be as careful as possible that the seed bed is a clean piece of ground, so that the young alfalfa plants are not smothered out by rapidly growing odd weeds.

(TO BE CONTINUED)

A GENERAL CLEAN-UP

(Continued from Page 1.)

Mr. McElhose said he had received complaints from various people around town about these houses, and he had given the parties who owned the houses notice that they would have to bury them, and they had assured him it would be done at once.

A SANITARY CRUSADE

A discussion took place as to what should be done in regard to the cleaning-up of the town, which it was admitted was not in a good sanitary condition as it might be. The chief trouble seemed to be that it was hard to get the garbage removed, the teamsters all being very busy. One member suggested that a general holiday should be proclaimed, but it was stated that most of the merchants and dealers could not afford to close up this period. Finally it was agreed to make an appeal to the inhabitants to clean up their premises, and the following resolution was adopted: "Whereas, the season is so far advanced as to render refuse from kitchens and garbage of all kinds a menace to the public health of Strathmore, and the accumulation of unsanitary materials in various places in the town a menace to public safety, be it resolved that an appeal be made to every public-spirited citizen of Strathmore to carefully remove immediately from his premises all such refuse as is commonly regarded as objectionable and all materials of an inflammable character."

Mr. Waddy moved adoption of the resolution, and it was passed unanimously.

TOWN POLICEMAN WANTED

The Council spent some time discussing the question of obstructions on the sidewalks, of tags for dogs, the destroying of stray dogs, and the keeping of a pound, and the conclusion was come to that these matters could not be satisfactorily attended to unless a permanent official was provided. It was therefore agreed to set about the appointment of a town constable. Several names were mentioned, and it was finally decided to ask a local gentleman if he was willing to take it up.

NEXT MEETING

The date of next meeting of the Council was fixed at Tuesday, May 5.

Blind Pigs, Drunks, and Prairie Fires

VARIED POLICE CALENDAR

A raid was brought off this week on blind pigs in the district, by Officers T. H. Irvine, R. N. W. M. J., and two Edmonton license inspectors, with the result that two cases were brought to light. The first was that of Ben Whistler, Nampa, occurred on Tuesday. Ben seemed to have smelt a rat, and had the whiskey concealed in a haystack, so that it took the officers three hours to find it. He was taken before Superintendent Deane at Calgary, and fined \$300 and costs.

The other case was that of a man named Hemroth, of the Bow River Dam, where there are a big number of men employed. He was fined the maximum penalty for a first offence—\$250 and costs or six months imprisonment. The fine was paid.

Three drunks disturbed the serenity of Strathmore on Monday morning so much that they had to be taken to the lock-up. Their names were John McLean, John Hyslop, and Allan Stevenson. They were fined from \$4 to \$6 and costs apiece or 24 days. Two of them took the Calgary rest cure.

An assault case preferred by Leo McDonald, an aged Strathmore farmer, against his two sons, Marshall and R. McDonald, came up on Saturday. From the evidence it appeared it was a kind of domestic squabble. Marshall was fined \$15 and costs, and his brother \$2 and costs.

A member of the Jay colony at Cheadle, Keji Muri, was fined \$40 and costs for having set a prairie fire going, and another Cheadle man named Smith was fined \$25 and costs for a similar offence.

On Tuesday afternoon a carpenter named J. Cleave employed on the extension to Mr. J. J. J. butcher store, had his brother buried in two places by the collapse of a scaffold on which he was working.

LA GRIPPE

Arrested, and Consumption Cured
 Mr. G. D. Colwell, of Walker in 1906 was laid low by La Grippe in 1906. He left his home in a very bad condition. He says: "I was all down and bordering on consumption. I could not get up, and I had all sweats, and coughed nearly all the time. This I have been told, and began to take Parole's in a few weeks' time. I had the first effect in a few days. I had more energy and I began to get back to work in no time, making a man of me. It is the only body against the attack of La Grippe and is a sure cure. I have never had it since, and I am now a well-to-do man and I put me right in it."

Nothing in That Line

Mr. Budget bent her gaze on George.

"Have you read Mr. Catcher's yellow book?" she asked him.

"I have, dear—it is very interesting."

"Ah! Then you noticed that she said the nation is looking for some one thing in particular?"

There appears to have a police officer who is glib with a serious humor. A few days ago the King was lying in the hay, and the King was going to sleep on the following morning, an old lady went to the hay and she asked him if he could tell her who was going to guard his Majesty all night.

The lad answered remarked that himself and seven more had the job, and were going to take it in turns, the evening round the best all night, thus keeping away any disturbance of the King's sleep. With this the old lady seemed satisfied.

An autograph time sent out from the Hamburg observatory by telephone to all instruments connected with the system of their have been heard of as Copenhagen and Paris.

The English in Iraq's were time prohibited from carrying weapons who were going to a prize.

Internally and Externally It Is Good.—The dressing property of the Thomas' Electric Oil is that it can be used internally for many of the ailments as well as externally. For the treatment of the chest, colds and coughs, it is a most valuable remedy. It is a most valuable remedy for the treatment of the chest, colds and coughs, it is a most valuable remedy.

His Ladyship—"Have you given Fido his?"

"Yes, 'um."

"And his pills?"

"Yes, 'um."

"And his Laship?" "Then you may have some bread and cheese and go to bed."

USING PURGATIVES INJURES HEALTH

What You Need in Spring is a Blood Building Tonic

A spring medicine is an actual need to most people. Nature demands it as an aid in carrying off the blood during the winter. But unfortunately thousands of people who recognize the necessity of a spring medicine do not know what to take and so mix themselves with harsh, gripping purgatives.

This is a serious mistake. Ask any one of the purgatives weakens the system but does not cure the blood. In the spring the system needs building up—purgatives cannot do this. They weaken you more. The blood should be made rich, red, and pure, and the medicine can do this.

This is the best blood building, and the most delicate medicine ever known to the world. It is the best blood building, and the most delicate medicine ever known to the world.

A WONDERFUL CAPTAIN

Collingwood Had Misfortune Always

Collingwood's fame is great and lasting, but in the imagination of his contemporaries he was a man of some shadowy figure among the more tangible heroes of his time, a man of noble achievement and a soldier of great reputation, but one who never moves alone, or first across the stage, says Henry Wood in The London Graphic. This was his destiny from the beginning, wherever he went he found a greater man ahead of him.

There is something strangely ominous in the regularity with which he was sent by fate to sail in Nelson's wake. As a lieutenant he succeeded him in the Lowestoff, and then in the Bristol, as a commander he followed him in the Bagdad, and as a post-captain in the Hinchinbrook. He was with him under Hughes in the Red India, and gave him invaluable backing through the troubles over the capture of the French frigate, the magnificent discomfiture at St. Vincent carried out on his plan for the first attack, succeeded him in the Mediterranean command, and there found death after a shorter struggle, but in the same obedience to the law of duty.

It is true that of this extraordinary record not only was the work of a captain, but may have been due to the insight of his authorities and the great mental resources were the result of Collingwood's own genius for leadership. He was a man of great public has hitherto been content to be a subordinate, and he has taken his place to form a clear picture of the man himself, apart from his memorable services and his almost morbidly morose personality.

Collingwood was actually less visible to his contemporaries than was a great Englishman of his time. To the people of these islands he was a man of great achievement and a soldier of great reputation, but one who never moves alone, or first across the stage, says Henry Wood in The London Graphic. This was his destiny from the beginning, wherever he went he found a greater man ahead of him.

This was his destiny from the beginning, wherever he went he found a greater man ahead of him.

There is something strangely ominous in the regularity with which he was sent by fate to sail in Nelson's wake. As a lieutenant he succeeded him in the Lowestoff, and then in the Bristol, as a commander he followed him in the Bagdad, and as a post-captain in the Hinchinbrook. He was with him under Hughes in the Red India, and gave him invaluable backing through the troubles over the capture of the French frigate, the magnificent discomfiture at St. Vincent carried out on his plan for the first attack, succeeded him in the Mediterranean command, and there found death after a shorter struggle, but in the same obedience to the law of duty.

It is true that of this extraordinary record not only was the work of a captain, but may have been due to the insight of his authorities and the great mental resources were the result of Collingwood's own genius for leadership. He was a man of great public has hitherto been content to be a subordinate, and he has taken his place to form a clear picture of the man himself, apart from his memorable services and his almost morbidly morose personality.

Collingwood was actually less visible to his contemporaries than was a great Englishman of his time. To the people of these islands he was a man of great achievement and a soldier of great reputation, but one who never moves alone, or first across the stage, says Henry Wood in The London Graphic. This was his destiny from the beginning, wherever he went he found a greater man ahead of him.

Assisting Him

Advent Young—Miss Dora, if I could find words to express my—

Enthusiastic, young woman, I am positively handing him a small book.

O Mr. Granowski, I am so glad. It is the simplest and most expressive language you ever heard of."

Racial pride is a kind of sentiment that lasts as long as any sentiment. The story of a stranger in Millwaukee, who, as a stranger, was working in the street, asked him what was the reputation of the town.

"Oh, about 40,000," was the reply. "I don't think it is much better, but I have more than that."

"Well," said the Irishman, "it would be about 25,000 if you were to count the Irish in the town."

"May I call you Mabel?" he asked at their second meeting, pretending to be a bully.

"If you wish to, but my name is Gerald."

"Perfectly trustworthy" is the character of Hicks' Anti-Consumptive Serum. It can be used with the utmost confidence, and it will not be claimed for it. It is pure in its effects, as the use of it clearly demonstrates and can be relied upon to give a cold out of the system more effectively than any other medicine. It is true that it is claimed to be so.

To prevent the attention of checks or other valuable papers an inventive mind has devised a simple and effective apparatus which burns tiny holes in the paper as the inscription is written.

PRESERVE BABY'S SKIN
 A lifetime of disfigurement and suffering may be avoided by the use of the most perfect skin medicine for infants and children, of simple and effective. In the prevention and treatment of minor eruptions and the promotion of permanent skin and hair, Cuticura Soap is the best. Cuticura Ointment is absolutely unrivalled. Rubbing, itching, and chafing yield to Cuticura. The Cuticura Remedy, The Potter Drug & Chemical Corporation, Boston, U.S.A., sole proprietors of the Cuticura Remedies, will be glad to send you their free catalogue book on the care and treatment of the skin and scalp.

When a girl gets old enough to have, she quits wearing sensible shoes.

To whom it may concern: This is to certify that I have used MIND & LINDSEY as well as prescribed in my practice where a liniment was required. I have never failed to get the desired effect.

C. A. KING, M.D.

Only a widow seems to appreciate that what a man does is as important to him as what a woman wears is to her.

DR. MORSE'S

CROP YIELD
IN ALBERTAFINAL BULLETIN UPON THE
CROP YIELD FOR 1909

Interesting Statistics Show Very Heavy Increases in the Yield of Grain During the Year 1909 in Alberta—The Total Yield of Grain for 1909 is Now Estimated to be 26,781,848 Bushels

Edmonton.—The provincial department of agriculture has issued the final bulletin upon the crop yield of the province for the year 1909.

According to the report the total area under crop last year was 1,242,644 acres, an increase over the previous year of 46 per cent. The yield of the different grains was as follows:

Wheat	10,650,540
Barley	2,459,604
Oats	1,343,000
Flax	13,330
Peas	5,900
Beans	1,000

In the report the following table is given:

Total Crop	Total Area
1909	26,781,848
1908	18,250,116
1907	10,614,116
1906	10,614,116

Continued from Page 4
knot, to soil in the west in winter
time, and as cabbage can be so
easily raised here right in the open
from seed without transplanting,
Strathmore should have the sour
knot proposition clinched beyond
doubt. Each hotel in Calgary uses
a car load of potatoes in the winter;
that should be grown at Strath-
more. Then there is evaporated
potatoes, for the mining districts,
another product from our factory,
whenever the people here realize
their opportunities.

GEORGE WELLS.

LANGDON NOTES.

Messrs Lloyd & Baker's well-
drilling outfit is busily engaged in
the vicinity of Danby.We congratulate Mr and Mrs A.
G. Lincoln on the arrival of a son
and heir, born in Calgary Monday
evening.A carload of barbed wire arrived
for Hill & Mery this week.A number of the boys are out on
the baseball field on Saturday
evening, and we see in them the
material for a good baseball team,
but it will need practice together
and a few games to call forth their
possibilities. We hope to see Capt.
Bosford evolve a right good team,
which shall bring honors every time
to Langdon.Messrs Hill and Morey sold an
American-Abell traction engine, 26
horse-power, to H. C. Gelineau, of
Keoma, also a complete threshing
outfit and plows.Mr A. K. McAdams, a chaffeur,
of Calgary, has taken a position on
Roy Kewen's grocery department,
and with Mrs McAdams are making
their home temporarily with Mr
John Whiting.Work on the new boarding house
is progressing slowly on account of
the scarcity of carpenters. We
understand it is to be rented by Mr
J. D. Barber.Mr Fred Dalton, of the Horse
Track district, is in town on
Tuesday, and reports that he and
Mr C. A. Phillips are putting in
about 800 acres, that their fall
wheat looks poor, but would prob-
ably come along if we had rain.Mr Patterson's first baking of
biscuits and bread was put on sale
last week and is all right.Messrs O & O. Rotford have
made quite an extension to their
business store, by the addition of
about twenty feet more floor room.We are sorry to hear that Coun-
cillor J. D. Barber is laid aside
again, and his illness necessitated
a visit of a Calgary physician in
consultation with Dr Wright.Mr Jos. Cambden's new cottage
is very near completion, and he will
move in about the first of the
month.Mr W. O. Cunliffe has just com-
pleted five weeks work painting
and decorating at Naboth's vine-
yard, the home of J. C. Bouy-
man and Thomas, of the houn-
dow and all the outbuildings have
been treated to two coats of paint.
Some very fine trees and ornamental
plants have been imported and set
out on the grounds and verandas.
Mr Cunliffe is now open for further
engagements for painting and
paperhanging.Mr A. Snider is planning about
100 acres in potatoes this year. He
has up-to-date planting machinery
for the work.A. W. Dingman, managing
director of the Calgary Natural Gas
Co., addressed a meeting of the
Board of Trade in Hicks Hall on
Friday last. He went thoroughly
into the geological construction of
the strata, and showed that it was
similar to other gas-producing
regions, and there was strong
probability of plenty of natural gas
under Langdon, and that at not a
very great depth. He laid out his
plan for the formation of a company
to take the matter up, sink gas
wells in Langdon, Calgary, Strath-
more, and Geichen, and proposed
that \$10,000 of the stock of the
company should be taken up by
Langdon. Mr Dingman also
answered questions which were
asked him about the project, and
also about the feasibility of utilizing
the soap holes round Weed Creek
for fire-clay and brickmaking.16 cars of freight went out on the
evening line Tuesday, and we noticed
a few steam outfits on the flat cars,
two to Heisker, and one to C. Cox,
Keoma.Mr Vernon has been appointed
C.P.R. station agent at Irricana.

DALROY

We are pleased to learn that the
Albertson School is nearing com-
pletion and will be ready for occu-
pation in the near future.There has been a number of cases
of measles of a mild type in the
district, but the children are recover-
ing without any serious after effects.The fine weather has been very
favorable to seedling and the farmers
in this locality have almost finished.
There has been a great deal of
spring wheat sown here. Messrs.
Kennon have 150 acres in spring
wheat.One of the drawbacks of rural
districts in the West is the lack of
social intercourse. This was very
pleasantly relieved last week, when
Mrs S. S. Kennon entertained the
ladies of the neighborhood at a
thimble tea, given for our teacher,
Miss Wilson. Mrs Woods, who
has lately arrived in our neighbor-
hood, delighted the company with
several artistic selections on the
piano. Mrs Prater also contributed
a number of selections. After a
dainty repast the remainder of the
evening was spent in conversation,
and the ladies departed after having
spent a very enjoyable time.Mr Geo. Rehder made a business
trip to Calgary last week.

CHEADLE

The new local C.P.R. train from
Bassano to Calgary is proving itself
quite a boon to the people of
Chedale, and is being well patron-
ized, for now the public are able to
make the return journey with Cal-
gary and transact business all in
the same day, returning home on
good time.The schoolroom was well filled
last Sunday for the worship of God,
and it is indeed inspiring to all
Christian workers to note such in-
creasing attendance, but it is
thought that the services may be
even more brighter still by everyone
having a hymn book, and being
able to join in the singing, and so
a concert is being arranged by friends
to take place probably next week,
whereby funds may be raised to
enable us to get the desired
b hymns.What might have been a disas-
trous prairie fire occurred here last
Tuesday. Every available man was
called out, and by strenuous efforts
the fire was extinguished by 5 o'-
clock in the evening, happily with-
out any farm buildings being burned
although at one period it looked as
though nothing would save them.Another train load of settlers
landed at Chedale on Sunday, and
all the farming land is being rapidly
taken up, and things in general
around Chedale and district never
looked more promising than at the
present day.

BUILDER AND CONTRACTOR.

Estimates cheerfully given on all kinds of buildings.
If in need of any work do not fail to let me give you
figures. First-class work done and Prices Right.

W. W. WHITFIELD,

Builder and Contractor.

Namaka, Alta.

IRRICANA

Work has commenced on the new
Gregory building. M. G. Hunt has
been the contract.Geo. L. Faull has a large sign
erected over his store.F. L. Haines of the Acme News
was in town a couple of days last
week.A baseball team has been organ-
ized and expect a game with Car-
bon toward the end of the month.Why not form two baseball lea-
gues comprising Langdon, Keoma,
and Irricana in one district, and
Strathmore, Bassano, and Geichen
in the other and play off for the
championship.Messrs Daly-Stout, Bier, and
Miller went to Calgary Thursday
returning Friday evening.Mr Alfred Roully spent a few
days in Calgary last week.

DELEWARE

Mr and Mrs Thomas Belway of
Winchester, Ont., are at present
employed by Mr G. M. McIlroy.Mr Stanley Timmondz is at pre-
sent occupying the old home of Mr
Calbeck. He has obtained land
nearby Calgary, upon which he in-
tends to live and suspend operations
on his homestead for the present.Mrs W. Stokes and her son, who
were from the States last Sunday,
and joined her husband and daughter
on the Crawford farm.Rev Mr Johnson gave a very in-
teresting lecture in the Schoolhouse
on Pilgrim's Progress on Wednes-
day evening.Planting in this district is almost
all done, and we long for rain to
give the crop a good start.
